Horace Drake, Plant Manager
Midwest Rubber & Reclaiming
3101 Mississippi Avenue
Sauget, Illinois 62206

Dear Mr. Drake:

As you may be aware, IEPA intends to conduct a full scale Remedial Investigation and Feasibility Study (RIFS) in the Sauget area. The primary focus of the RIFS is Dead Creek. However, due to known and suspected widespread disposal of waste in the Sauget area, it is imperative that a full accounting of wastes and overall environmental quality be performed in the area in order to detail actions for Dead Creek.

Enclosed with this letter, please find a proposed Scope of Work for the RIFS. You will notice that the proposed sites include property which may be of interest to Midwest Rubber and Reclaiming.

The Scope of Work is very detailed and will likely be very costly. IEPA wishes to avoid work that may be unnecessary wherever possible and would very much appreciate cooperation by your firm in our proposed investigation. IEPA further realizes that Midwest Rubber and Reclaiming, by virtue of its long history in the area, represents a collective base of information regarding past activities in the Sauget area which could be of great use in the proposed study.

The purpose of this letter is to open communication between your firm and IEPA regarding the proposed RIFS. This letter is not a request for site access, but site access will be requested in the near future.

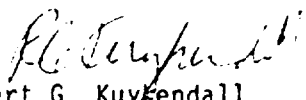

I would appreciate being able to openly discuss applicable issues with you at your convenience. I also appreciate the legal sensitivity of these issues at the current time. This letter is a request for cooperation and does not, nor should be construed to represent any type of documentation that IEPA is notifying Midwest Rubber & Reclaiming of potential responsible party status with the inherent requirements of such action.

I feel that a general discussion of issues would be worthwhile for both parties regardless of your firm's position on cooperation. I would like to schedule this as soon as possible. Please contact me or Steve Dunn of my staff at your convenience after you have considered this letter. If no response is received by August 6, 1985, this office will contact you.

Sincerely,

Robert G. Kuykendall
Manager
Division of Land Pollution Control
